

Software Enhancement Agreement

Features

- **Assures continued compatibility with current DSI hardware and software products**
- **Provides software updates, service packs and product enhancements**
- **Unlimited phone and email support during normal business hours**
- **Annual agreements available**
- **Multiple system discounts**
- **Lower cost of ownership**
- **Access to every revision**

The Software Enhancements provided by this agreement will include software updates and continued compatibility with Data Sciences International (DSI) current hardware and software products, service packs which correct software errors, as well as product enhancements that provide additional features or enhancements of functionality to the originally licensed software version. DSI reserves the right to classify capabilities added to the covered software as either *Product Enhancements* which would be covered by a Software Enhancement Agreement, or as *Options*, which are not covered by the Software Enhancement Agreement but can be purchased separately by the Customer. Any cost of hardware changes required to implement Software Enhancements shall be the responsibility of the Customer.

DSI's Software Enhancement Agreement obligations

are for a period of (1) year from the date the order is acknowledged by DSI Customer Service.

Software Enhancement service can be renewed on an annual basis (by Customer's payment of the applicable fee prior to the expiration of the then-current agreement) for as long as the software in question is currently supported by DSI.

All Software Enhancements are and shall remain the property of DSI or its licensors and are protected by copyright law. While DSI continues to own the Software Enhancements, Customer will have the right to use the Software Enhancements provided under the Software License Agreement to the same extent (and with the same limitations) as its right to use the originally licensed software.

Technical Data Sheet

Software Enhancement Agreement

The fee structure for Software Enhancement Agreement service is based on the number of software options currently active on Customer's DSI software package. An option is defined as a pay for software feature, which enhances the capabilities of a base DSI Ponemah system. Options include all software analysis modules, recorder drivers and other features. Please contact your local Technical Sales Representative for a detailed quotation.

A surcharge of 25%* will be applied at the time of purchase for every revision level the system in question is behind the version currently shipping to new customers.

***NOTE: A three-month grace period (from date of shipment) will void any Revision Level Surcharge. Therefore a customer purchasing a software system has up to 3 months to purchase the Software Enhancement Agreement without being accessed the 25% surcharge.**

Multiple System (workstation) Discount:

1-9	0
10-24	10%
25-49	20%
50-Plus	25%
