

DSI™

User Meeting, October 4-6 Assessment of in-vivo physiological data

Please join DSI and the University of Minnesota Department of Integrative Biology and Physiology for the 2017 DSI U.S. User Group meeting. The User Group meeting provides a unique opportunity for researchers to learn more about in-vivo methods for monitoring physiological end points in a wide range of research fields, and to discuss, engage and network with other users and peers.

20 presenters including keynote speaker John W. Osborn, PhD, Professor, Marvin and Hadassah Bacaner Chair in Cardiovascular Physiology, Department of Integrative Biology and Physiology, University of Minnesota Medical School.

Preliminary Topics and Events:

- Cardiovascular, CNS, metabolism and respiratory animal models (Large and Small animal)
- Use of telemetry for infectious disease and biodefense research
- Data handling for ECG arrhythmia analysis, sleep and seizure scoring
- Research "Data Blast"; a fun way to present data in 3 slides and 3 minutes (or less)
- Meet with DSI Scientific Services: bring your data to discuss best methods for analysis and reporting
- Get dedicated time with DSI technical support: complete your training and/or discuss ways to optimize your setup
- Tour DSI's world headquarters in St. Paul: get a factory tour and meet the staff
